- ✓ PRODUCT SUPPLY
- ✓ INSTALLATION
- ✓ MAINTENANCE

### GREENRISE PROVIDES COMPLETE INTEGRATED SYSTEMS & SOLUTIONS.

As a turnkey provider of water quality systems, inspection, maintenance, and compliance, combined with our turnkey approach to underground detention solutions, we can examine multifunctional design approaches and create a plan that provides unmatched functionality, increased performance, and overall cost efficiencies. No one else comes close.

## THE PRESERVER™

by **MOMENTUM ENVIRONMENTAL**

### THE TREATMENT SYSTEM

The Preserver can be used as a pretreatment or a stand-alone BMP, providing proven performance to meet project requirements.

The Preserver system is a great choice for the pretreatment of MODvauld and MODarch systems. It is low-cost and easy to install. Combined with efficient maintenance, The Preserver reduces overall installation and long-term maintenance costs.

**THE SUPERIOR PRETREATMENT CHOICE FOR GREENRISE'S TURNKEY DETENTION SOLUTIONS.**

# HOW DOES The Preserver WORK?

## THE COMPONENTS

Utilize Individually or Together Based on Project Needs.

### THE PRESERVER ENERGY DISSIPATOR

### THE PRESERVER SKIMMER

## THE FEATURES

### ENERGY DISSIPATOR

- Installed at the structure inlet(s)
- Design to eliminate pollutant washout at high flows
- Enhances pollutant removal at low flows
- Designed and tested to work with or without a Skimmer

### SKIMMER

- Installed at the structure outlet(s)
- Traps floatable pollutants like trash, oil, and grease
- Enhances capture of organic debris to reduce downstream nutrient pollution
- Designed to work with or without a Dissipator
